PRODUCT ENGINEERING

PUBLISHED MONTHLY

McGRAW-HILL PUBLISHING COMPANY, INC. 330 West 42d Street, New York, N. Y.

INDEX TO VOLUME 7

January to December 1936

January 1–40
February 41–80
March 81–120
April 121–160
May 161–200
June 201–244
July 245–284
August 285–324
September 325–364
October 365–404
November 405–442
December 443–482

A

Addressograph, electrically operated.....*331

Aeronautics:

Stress calculations for thin aluminum alloy sections G. L. Martin Airplanes. Kilpatrick & Schaefer, pt. 1 compression members *49; pt. 2 design of shear members *93; pt. 3 hollow girders *129; pt. 4 torsion..*172
German airship to be the largest.... *56
Air conditioning unit of small size.....*304

Aluminum:

Alloys of aluminum and their uses. P. V. Faragher, pt. 1 *62; pt. 2..*137
Aluminum pressings. Smith & Malby.*384
Redesigning to use aluminum. G. W. DeBell *42
Shape factors for formed sheet aluminum compression members. Kilpatrick & Schaefer (Ref. Bk. Sheets) *79

American Gear Manufacturers' Assn.:

Great Lakes meeting..... 396

American Institute of Electrical Engineers:

50th anniversary of first A.C. system. 152

American Society for Metals:

Program for meeting..... 373

American Society of Mechanical Engineers:

Program for meeting..... 375

American Society of Testing Materials:

Committees hold group meetings.... 193

American Welding Society:

Program for meeting..... 375

Appearances and Finishes:

Better finishes and protections.....*441
Designers of home equipment put emphasis on appearance (charts).... 408
Enamel finish obtained by spraying metal on porcelain enamel..... *47
Measuring surface finishes. W. G. Meyers *5
1936 directory of sources of supply of materials, finishes and supplies. (Nov. page 9, advertising section).
Phenolic plastics. F. E. Brill.....*462

Appliances:

Strain reliefs and protectors for appliance cords. T. D. Foster..... *99
Applied Mechanics meeting..... 277
Artillery primers, machine for automatically loading. L. E. Simon.....*465

Automobiles:

Clamp-ring safety brake. P. R. Wheeler *147
Arvin automobile heated. E. C. Booth *90
Lincoln-Zephyr body assembled by welding *61
Machine which automatically inspects Ford camshafts *98
Scarab car has four point suspension of wheels *87
Welded gas tanks..... 88

B

Bandsaw with pressure feed.....*331
Bar—effect of specimen length on test data. L. G. Hall..... 67

Bearings:

Babbitt for sleeve bearings. Henry Martin, A. J. Phillips..... 149
B.E.C. machine for testing the mechanical stability of greases.....*255
Bearing pressures *109
Lubrication of sleeve bearings. R. G. N. Evans, pt. 2 *2; pt. 3 *57; pt..*105
Materials for jewel bearings. B. W. St. Clair *180
Mold rubber ball bearing mounting..*333
Vertical mounting of ball bearing. Thomas Barish *188
Vertical shaft bearing lubrication. Hall, Hyler *352
Welded bases for bearing support, slide lever, frames and connecting rods *472
Bellows, gas-tight metal.....*134

Belts:

Belt lengths and pulley diameters. E. N. Kemler (Ref. Bk. Sheets).....*199
Calculating belts for stepped pulleys. E. J. Rantsch.....*312
Bench, work *166
Book reviews.....37, 78, 118, 158, 198, 236, 283, 322, 362, 402, 480
Bottle blowing machine.....*127
Brake, clamp-ring safety. P. R. Wheeler.*147
Brakes, electrically operated.....*214
Brazing joints in the furnace. B. W. Gonser *444
Broadcasting, spot *88

C

Cams:

Analysis and comparison of cam actions. R. E. Grobe.....*339

Camshaft:

Machine which automatically inspects Ford camshafts *98
Cars for B.M.T. subway—welded steel trucks for light weight cars.....*276

Castings:

Die castings for strength and economy *166
Light machinery and equipment feature stampings, plastics and die-castings (charts) 418

Charts:

How to make alignment charts. M. G. Van Voorhis, pt. 1 *15; pt. 2 *53; pt. 3 *101; pt. 4 *183; pt. 5 *266; pt. 6 *307; pt. 7.....*334
Chute, hopper feed. A. M. Holland.....*188
Cleaning machine with automatic cycle control *205

Clutches:

Air-electric control for clutches and brakes *249
Effective radius of disk clutches. L. D. Hagenbook *107
Electrically operated clutches, brakes and valves *214

Color:

Color illusions. Howard Ketcham.... *25
Mercury streamlined train with special color scheme. Henry Dreyfuss *258
Paris colors new cables to New York 357

Controls:

Air-electric control for clutches and brakes *249
Automatic reversal for candy machine. W. E. Summerhill.....*391
Circuits and controls for a hydraulic-electric gear grinder.....*301
Clutches, brakes and valves electrically operated *214
Control devices and instruments at the National Metal Show.....*370
Directory of controls, drives..... 239
Electrical devices for automatic operations *202
Governor-controlled fractional-horsepower motors. R. W. Groot.....*216
Grinding machine has hydraulic feeds.*225
Grinding machine with hydraulic table drive *222
Hydraulic operation—unit parts and typical circuits *219
Hydraulically-interlocked cylinders..*220
Ladder controlled by manual triple valve *223
Methods of electric control. R. S. Elberty, Jr., pt. 1.....*228
Motor control unit for outdoor service *166
Production machinery designers improve drives and speed control (charts) 410
Saw machine has self-contained unit for feed control.....*222
Self-locking circuits on unit type of machine *225
Shaper-planer operated hydraulically by regenerative circuit.....*226
Shovel has solenoid valve for clutch control *224

*Illustrated

Solenoid controlled operations.....*221
Vacuum switches for controlling conveyors *88
Couplings, flexible, of stranded wire, Smack, Donaldson 108
Typical designs of flexible couplings, Cyril Donaldson, pt. 1 *30; pt. 2 *70; pt. 3 *110; pt. 4.....*150
Crane, bantam, uses welded tubular boom 87
Crane gears *250
Crankshaft journals, locally hardened...*450

D

Deflections and stresses in flat plates. R. J. Roark *252

Design, Calculations and Examples:

Activities and trends in product design (charts) 406
Addressograph, electrically operated.*331
B.E.C. machine for testing the mechanical stability of greases.....*255
Brazing joints in the furnace and their design. B. W. Gonser.....*444
Designing for business growth. G. H. Gibson *12
Dial calculator for adding and subtracting common and mixed fractions. H. O. Nekola.....*351
Electrical devices for automatic operations *202
Eyelet button hole machine.....*293
Flexible coupling designs. Cyril Donaldson, pt. 1 *30; pt. 2 *70; pt. 3 *110; pt. 4.....*150
Gear grinder with hydraulic control..*301
Hone, precision, for finishing holes to .0001 in limits.....*291
Hoover Company's development and engineering procedure. U. A. Whitaker *122
Multi-speed free wheeling drive for centrifugals *257
New things offered by industry for improving product design.....*422
Non-circular gear design. J. J. Pesqueira, pt. 1.....*454
Oxygen absorption bomb for testing storate ability of grease. Wright & Lutz *210
Polishing machine engineered and build in 8 weeks.....*2
Proportioning sizes of similar parts. Cyril Donaldson *345
Redesigning to use aluminum. G. W. DeBell *42
Refrigerator designed with ducts and baffles for silencing and ventilating. S. C. Eaker.....*348
Simplifying helical spring design. J. K. Wood *59
Slot-machine for salted nuts with slug proof mechanism.....*291
Stress calculations for thin aluminum alloy sections. G. L. Martin airplanes. Kilpatrick & Schaefer, pt. 1 compression members *49; pt. 2 design of shear members *93; pt. 3 hollow girders *129; pt. 4 torsion..*172
Switches and switch mountings. B. B. Ramey, pt. 1 *190; pt. 2.....*274
Trends in product development..... 421
Washing machine redesigned.....*450
Desk holding records hydraulically operated *227

Dies:

Exhibit of die castings..... 153
Yoke and ball race inserts in die casting *448
Directory number. (November, beginning on page 9 of advertising section).
Dough mixer has automatic timers for controlling mixing periods.....*208

Drawings:

Drafting room methods and management. J. K. Olsen, pt. 1 *162; pt. 2.*260
Drill, portable placer.....*47
Drill with flexible shafting.....*448

Drives:

Comparative test results of gear and hydraulic drives. M. Kronenberg..*326
Directory of electric and hydraulic drives 239
Motor applications for built-in drives.*209
Multi-speed drive for home work shop *449
Multi-speed free wheeling drive for centrifugals *257
Production machinery designers improve drives and speed control (charts) 410
Wearn Autoflex drive..... *87
Dump wagon has telescoping hydraulic jack *227
Durhy—What is it? A. S. Ulmer..... 471

E

Editorials:

Broader outlook 325
Control 201
Engineering self respect..... 161
Evolutionary engineering 443
Expensive uncertainties 121
For the company's profit at the company's expense 365
More engineering or more materials?. 285
Professions and unions can't mix.... 41
Science and social progress..... 245
Shall it be quality or price?..... 405
Technological boondoggle 81
Those society papers..... 1
Electric heating alloys, how to select. F. P. Peters *19
Ellipses, alignment chart for approximate. J. S. Beggs.....*148
Enamels, acid tests for..... 357

Engineering:

Engineering procedure of the Hoover Company. U. A. Whitaker.....*122
Relation of industrial designer to established engineering departments. Lowey, Dreyfus, Van Doren..... 311

Engines:

Alignment chart for engine horsepower. C. P. Nachod..... *23
Changes in combustion chambers.... 128
Pressure circulation for automobile engines *127
Eyelet buttonhole machine.....*293

F

Fan motor, lubricant seal for.....*128
Fans, two-bladed *250
Filling, crowning and syruping machine has electrical devices as safety controls *207
Finishing machine for textiles has range drive speed control.....*204
Flask, foundry, of magnesium alloy..... *47
Ford laboratory placed in operation..... 230
Fountain pen valve design..... *46
Furnaces displayed at the National Metal Show *366

G

Gage based on preferred numbers. J. I. Hommel 391
Gas volumes based on Boyle's and Charles' gas laws. T. W. Brinkley (Ref. Bk. Sheets) *482

Gears:

Are elliptical gears in modern use? Leduc, Pesqueira 392
Bevel gear teeth. Lloyd & Mickle...*272
Design for non-circular gears. J. J. Pesqueira, pt. 1.....*454
Diametral pitch of spur gears. W. H. Clapp (Ref. Bk. Sheets).....*403
Double helical gear calculations. E. R. Gasser (Ref. Bk. Sheets)..... 159
Gear pump formulas. Weightman, Pesqueira 353
Nitrided gears. C. H. Hughes..... 392
Pinion centers for planetary gears. C. A. Johnson, W. Spencer..... 148
Pinion centers for planetary gears. W. Spencer *23
Trends in gear materials..... 266
Welded crane gears.....*250
Glass, polarizing 112
Grinder, hydraulic operated gear.....*301
Grinder, stone, with variable drive.....*167
Grinder with internal rotor..... *11
Grinding machine has hydraulic feeds....*225
Grinding machine with hydraulic drive..*222

H

Heater, Arvin automobile. E. C. Booth.. *90
Heater, water *332
Hoist, monorail *250
Hone, precision, for finishing holes.....*291
Hose for high pressure service. A. D. Maclachlan *451
Hydraulic operation—unit parts and typical circuits *219

J

Jack, telescoping hydraulic.....*227
Jewel bearings, selection of materials for. B. W. St. Clair.....*180
Joints brazed in the furnace. B. W. Gonser *444
Journals, locally hardened crankshaft...*450

L

Laboratory equipment at the National Metal Show *372
Lacquering and painting specifications... 143
Ladder, collapsible, to service high rooms *9
Ladder controlled by manual triple valve.*223
Lamp housing for toy railway.....*251
Lathe, vertical turret, with automatic control of cutting speed.....*206
Lathe with centrifugal speed switch for inching *203
Lathe with inverted tool to facilitate chip removal *9

Lights and Lighting:

Scale illumination. G. H. Grocott.... *24
Load distribution, determination of. F. A. Mickel 187

Locomotives:

Locomotive rod, chrome plated.....*338
Steam-electric locomotive to have condensers 396
Loudspeaker with umbrella shape.....*332

Lubrication:

B.E.C. machine for testing the mechanical stability of greases.....*255
Determining quickly the storage stability of lubricating greases. Wright & Lutz *210
Lubrication of sleeve bearings. R. G. N. Evans, pt. 2 *6; pt. 3 *57; pt. 4.*105
Rubber hose for high-pressure service. A. D. Maclachlan.....*451
Vertical shaft bearing lubrication. Fred Adams *108
Vertical shaft bearing lubrication. W. E. Summerhill *187

M

Materials:

Alloys of aluminum and their uses. P. V. Faragher, pt. 1 *62; pt. 2...*137
Analysis of materials by the X-ray diffraction methods. H. R. Isenburger *177
Developments in the non-metal materials *429
Durhy—What is it? A. S. Ulmer.... 471
Establishing standards for materials. Hellmund & Miner, pt. 1 *82; pt. 2.*144
Length of Material for 90 deg. forms. J. K. Olsen (Ref. Bk. Sheets), pt. 2 39; pt. 3..... 40
Marblette for photo-elastic models. A. G. Solakian.....*107
1936 directory of sources of supply for materials and finished parts. (Nov., page 9, advertising section).
Properties of sprayed molten metal.. 276
Selection of material for jewel bearings. B. W. St. Clair.....*180
Materials, see also Plastics.

McGraw-Hill Publishing Company— changes officers *73

Mechanisms and Construction:

Analysis and comparison of cam actions. R. E. Grobe.....*339
Basis for determining manufacturing tolerances. Ettinger & Bartky...*297
Belt lengths and pulley diameters. E. N. Kemler (Ref. Bk. Sheets).....*199
Clamp-ring safety brake. P. R. Wheeler *147
Deflections and stresses in coiled springs made of rectangular wire. E. W. Stewart.....*286
Deflections and stresses in flat plates. R. J. Roark.....*252
Development of a machine for automatically loading primers for artillery ammunition. L. E. Simon..*465
Diametral pitch of spur gears. W. H. Clapp (Ref. Bk. Sheets).....*403
Drafting room methods and management. J. K. Olsen, pt. 1 *162; pt. 2 .....*260
Electrically operated clutches, brakes and valves *214
Forces and accelerations in slider-crank mechanisms. J. L. Swyers..*341
How to make alignment charts. M. G. Van Voorhis, pt. 1 *15; pt. 2 *53; pt 3 *101; pt. 4 *183; pt. 5 *267; pt. 6 *307; pt. 7.....*334
Irregular plane sections. R. V. Hutchinson *273
Methods of electric control. R. S. Elberty Jr., pt. 1.....*228
Modifying geometric progression of speeds. E. J. Rantsch *471
Slider-crank mechanism. J. L. Swyers (Ref. Bk. Sheets). *323; pt. 2..*363
Spiral diagrams to solve vibration damping problems. H. O. Fuchs..*294
Stress calculations for thin aluminum alloy sections. G. L. Martin Airplanes. Kilpatrick & Schaefer, pt. 1 compression members *49; pt. 2 design of shear members *93; pt. 3 hollow girders *129; pt. 4 torsion..*172
Tests of gear and hydraulic drives. M. Kronenberg *326
Vibration damping tests for resilient mountings. S. D. Sablove.....*246
Wobble motion adjustable with spherical collars. J. E. Hyler.....*471
X-ray diffraction analysis of materials. H. R. Isenburger.....*177

Metals:

Aluminum pressings. Smith & Malby.*384
Beryllium copper molds for plastics. E. N. Schmitt..... 187
Beryllium copper molds open new uses for plastics..... 152
Developments in metals and alloys..*424
Ferrocolumbium now available..... 33
Flow of metal in stampings. E. C. Booth *90

*Illustrated

How to select electric heating alloys. F. P. Peters *19
Low-alloy high strength steels for designing. C. E. McQuigg *387
Magnesium alloy foundry flask *47
National Metal Show at Cleveland ... *366
1936 directory of sources of supply for materials and finished parts. (Nov., page 9, advertising section).
Spraying metal on porcelain enamel .. *47
Microphone with new magnet alloy *10
Microphone wrapped in sponge rubber *333
Milling machines — solenoid controlled operations *221
Mirror extensometer magnification. M. F. Sayre *22

Motors:

Directory of motors 239
Governor-controlled, fractional-horsepower motors. R. W. Groot *216
Governor-controlled motors 271
Motor applications for built-in drives. *209
Multi-speed free wheeling drive for centrifugals *257
New electric motors and devices *432

N

National Metal Congress & Exposition—program 356
National Metal Show at Cleveland *366
New materials and parts 34, 74, 114, 154, 194, 232, 278, 318, 358, 398, 477

O

Ohm's Law equations and chart. R. C. Hitchcock (Ref. Bk. Sheet) 237
Optical extensometer problem. N. M. Wickstrand *68; R. W. Wood, Jr., *108
Oxygen absorption bomb for testing storage stability of greases. Wright & Lutz *210

P

Packings, how to apply V-leather. J. N. Smith *141

Paints:

Specifications for painting and lacquering 143

Parts and Units:

Air conditioning unit uses same parts for all models *304
Arvin automobile heater—flow of metal in stampings. E. C. Booth .. *90
Brazing joints in the furnace. B. W. Gonser *444
Cam-lock for face plates and chucks. *249
Gas-tight flexible metal bellows of corrosion-resistant materials *134
Governor-controlled, fractional-horsepower motors. R. W. Groot *216
How to apply V-leather packings. J. N. Smith *141
How to specify springs. R. L. Stoughton *170
Hydraulic operation—unit parts and typical circuits *219
Improved mechanical parts *437
Lubrication of sleeve bearings. R. G. N. Evans, pt. 2 *6; pt. 3 *37; pt. 4. *105
Machine which automatically inspects Ford camshafts *98
Materials for jewel bearings. B. W. St. Clair *180
1936 directory of sources of supply for materials and finished parts. (Nov., page 9, advertising section).
Rubber hose for high pressure service. A. D. Maclachlan *451
Seal of flexible rubber *458
Switch inclosed in plastic housing. Arthur Riche *469
Top of hard rubber for bottle cooler. *292
Typical joints of arc-welded structurals. R. A. Gast, pt. 1 *314; pt. 2. *354
Typical welded bases and pedestals, pt. 1 *394; pt. 2 ..... *472

Patents:

Changes in patent procedure recommended 32
Designing for business growth. G. H. Gibson *12
Phonograph uses endless sound film *167
Photo-elastic models of Marblette. A. G. Solakian *107
Piston, aluminum *332
Piston rings versus cup leathers. Best, Maha, Lundskow *353
Pivot, self centering knife-edge. George Grocott *272
Plant and shop equipment at the National Metal Show *371

Plastics:

Beryllium copper molds for plastics. E. N. Schmidt 187
Beryllium copper molds open new uses for plastics 152
Foreign radios in plastics *29
Light machinery and equipment feature stampings, plastics and die-castings (charts) 418
Marblette for photo elastic models. A. G. Solakian *107
Molded plastic rod ends and tray corners *333
Phenolic plastics. F. E. Brill *462

Plating:

Chrome plated locomotive rods *338
Plating beryllium-copper molds. K. N. Atwater 313
Polarizing glass 112
Polishing machine engineered and built in 8 weeks *2
Press brake *169
Press, steel *86
Primers for artillery ammunition, development of machine for automatically loading. L. E. Simon *465

Product Engineering—editorial staff 1
Profilograph for measuring surface finishes. W. G. Meyers *5
Pulley diameters and belt lengths. E. N. Kemler. (Ref. Bk. Sheets) *199
Pumps—gasoline pump *126
Purchasing agent. G. A. Renard 104

Q

Queen Mary *192

R

Radios, foreign, in plastics *29
Railway car of stainless steel *112

Reference Book Sheets:

Belt lengths and pulley diameters. E. N. Kemler *199
Determination of semi-elliptic laminated springs. Sal Colacuori *119
Diametral pitch of spur gears. W. H. Clapp *403
Double helical gear calculations. E. R. Gasser 159
Equations for Ohm's law and a chart for their solution. R. C. Hitchcock 237
Gas volumes based on Boyle's and Charles' gas laws. T. W. Brinkley. *481
Length of material for 90-deg. forms. J. K. Olsen ..... pt. 2 39; pt. 3 40
Slider crank mechanism. J. L. Swyers ..... *323; pt. 2 *363
Shape factors for formed sheet aluminum compresison members. Kilpatrick & Schaefer *79

Refrigeration and Refrigerators:

Refrigerator designed with ducts and baffles for silencing and ventilating. S. C. Baker *348
Refrigerator has decorative moldings that snap on *166
Riveter, light weight 47
Robotyper *140
Roll, cylindrical, length of material on. J. S. Beggs *69

Rubber:

Rubber under pressure. J. E. Hyler ... 149
Seal of flexible rubber *458
Synthetic rubber mixed with cork. E. H. Causey 312

S

Saw machine has self-contained unit for feed control *222
Scale with aluminum chart *189
Scraper has hydraulically interlocked cylinders *220
Seal, 100 per cent. Kohler, Gangi *393
Seal of flexible rubber *458
Shaper-planer operated hydraulically by regenerative circuit *226
Shipping liability of manufacturer. Leslie Childs 271
Shovel has solenoid valve for clutch control *224
Slider-crank mechanisms. J. L. Swyers. *341
Slider-crank mechanism. J. L. Swyers. (Ref. Bk. Sheets) ..... *323; pt. 2 *363
Slot machine for salted nuts *291
Solenoid controlled operations *221
Solenoid design. L. G. Hall 312
Speed, modifying geometric progression of E. J. Rantsch *471
Spindle, lathe, with cam type of clamp. *249

Springs:

Deflections and stresses in coiled springs made of rectangular wire. E. W. Stewart *286
Determination of semi-elliptic laminated springs. Sal Colacuori. (Ref. Bk. Sheets) *119
Helical spring design. J. K. Wood .. *59
How to specify springs. R. L. Stoughton *170

Stampings:

Automotive and aeronautical designers favor stampings and formed sheets (charts) 416
Flow of metal in stampings. E. C. Booth *90
Light machinery and equipment feature stampings, plastics and die-castings (charts) 418

Standardization:

Brass fittings now standardized 277
Establishing standards for materials. Hellmund & Miner, pt. 1 *82; pt. 2 *144
Sound level meters now standardized 231

Steel:

Design factors using moderately alloyed steels. C. E. McQuigg *387
Designers of mobile machinery adopting low-alloy steels (charts) 414
Pressed steel possibilities 273
Specifying alloy steels *459
Steering shaft, resistance welded *9

Stresses:

Deflections and stresses in flat plates. R. J. Roark *255
Switch inclosed in plastic housing. Arthur Riche *469
Switch, vacuum, for controlling conveyors *88
Switches and switch mountings. B. B. Ramey ..... pt. 1 *190; pt. 2 *274

T

Tank heads, chart for. C. E. Lewis *68
Tank, welded gasoline 88
Thermometer, built-in *251
Thermometer, circular *331
Thermometer, modern *9
Thermostat, for high voltage *168
Thread, internal, molded without a screw core *182
Tolerances, basis for determining manufacturing. Ettinger & Bartky *297
Top of hard rubber for bottle cooler *292

Trains—streamlined:

B. & O. streamlined train of aluminum. G. W. DeBell *42
Mercury train with special color scheme. Henry Dreyfuss *258
Truck body of stainless steel *126
Tubing, glass, chart for determining weight of. Richardson, Van Voorhis *390
Typewriter desk—Robotyper *140

V

Valves:

Electrically operated clutches, brakes and valves 214
Fountain pen valve design *46
Variable intermittent motion. W. M. Halliday *67
Vibration damping tests for resilient mountings. S. D. Sablove *246
Vibration problem solutions. H. O. Fuchs *294

W

Washing machine redesigned *450
Watt, James—birth celebrated 72

Welding:

Abstracts of paper on welding to be presented at National Metal Congress. Crawford, Richter, Rooke, Saacke, Kugler, Davenport, Aborn, Henry, Lyse, Gibson, Jenson, Leach, Smith, Larson, Jennings, Warner, Kinzel, Marsh, Wills, Lindemuth, Hoglund, Flocke, Schaefer, Hook, Brown 377
Bearing retainer welded to shaft. Fred Adams *393
Plant equipment designers increase the use of welding (charts) 412
Pliers with carbon jaw pieces which serve as electrodes *292
Typical joints of arc-welded structurals. R. A. Gast, pt. 1 *314; pt. 2 *354
Typical welded bases and pedestals pt. 1 *394; pt. 2 *472
Welding equipment at the National Metal Show *371
Wiring—strain reliefs and protectors for appliance cords. T. D. Foster *99
Wobble motion adjustable with spherical collars. J. E. Hyler *471

X

X-ray diffraction analysis of materials. H. R. Isenburger ..... *177; pt. 2 *264

Y

Yoke and ball race inserts in die casting. *448

*Illustrated
